1. If you are just installing Blubster, you can turn off sharing during installation. In the **Blubster Configuration Assistant** window click the **Remove...** button.

2. Select all the shared folders and click **Remove**. Click **Close**.

3. If Blubster is already installed click the **My Music** button in the main window. Click the **Unshare** button to bring up the same **Remove Folder** window pictured above. Select all the shared folders and click **Remove**. Click **Close**.
