1. Select the **Preferences** item from the **Poisoned** menu.

2. Click on the **Sharing** button at the top of the resulting window. Make sure there are no files and/or folders listed. If files/folders are listed you may select each one and click on the **Remove** button.

Note that you cannot remove the first folder.
3. Navigate to the * PoisonedDownloads * folder and remove all of the files in that folder.
