1 INTRODUCTION

This handbook is for students in the College of Education (COE) at the University of the Southwest (USW). The handbook overviews program requirements, policies, rules, and regulations. The information included will facilitate students' progress toward attaining the program objectives.

The purpose of this handbook is to supplement and clarify – not supersede – policies and procedures provided at the College of Education or the University of the Southwest.

2 CERTIFICATION PROGRAM

The program prepares certified teachers for certification as educational diagnosticians in New Mexico. The program is closely aligned with the New Mexico Public Education Standards and incorporates the professional standards of the Council for Exceptional Children organization (<https://exceptionalchildren.org/standards/advanced-special-education-preparation-standards>). Completers find abundant opportunities for challenging and rewarding careers.

3 LICENSURE

Licensure for New Mexico requires completing all coursework and the internship. For licensure information, see the New Mexico Educational Diagnostician licensure requirements at <https://webnew.ped.state.nm.us/bureaus/licensure/how-to-apply/educational-diagnostician-pre-k-12/>

4 EDUCATIONAL DIAGNOSTICIAN INTERNSHIP

The University of the Southwest Educational Diagnostician Program regards the internship as the final "capstone" course. The internship provides opportunities to practice the knowledge gained through coursework under the supervision of a licensed professional educational diagnostician. Students will be supervised in the practice of testing procedures, completing comprehensive assessments, preparing written reports of assessments, attending IEP meetings, and presenting test data to committee members. The primary focus and purpose of the certification program are to ensure completion of coursework, and the internship provides the intern with the competencies necessary for educational diagnostician roles and duties.

To complete program requirements, students in the educational diagnostician program must enroll in EDUC 5393 and complete 300 hours of supervised internship experience in a public school. Completing the internship is a component of state requirements for certification as an educational diagnostician. The internship is the final "capstone" field experience that builds on and integrates prior experiences and coursework, allowing increasing autonomy in providing comprehensive diagnostic services under supervision.

4.1 EDUCATIONAL DIAGNOSTICIAN COURSEWORK

Students take a minimum of thirty (30) credit hours of coursework to complete certification. The program is designed so students can complete certification requirements in 1-2 years. All courses are online. Students will follow their approved degree plan that is in place on the date of acceptance into the Educational Diagnostic Program.

4.2 MINIMUM REQUIRED COURSES

EDUC 5103 Educational Research & Academic Writing
EDUC 5123 Human Development Across the Lifespan
EDUC 5303 Introduction to Mild, Moderate & Severe Disabilities
EDUC 5313 Adapting Curriculum for Exceptional Learners
EDUC 5343 Education Law & Special Education Law
EDUC 5333 Behavior Management
EDUC 5353 Introduction to Psychoeducational Assessment
EDUC 5373 Counseling Theories for Ed Diag

EDUC 5393A Internship in Educational Diagnostics I*

EDUC 5393B Continuing Internship in Educational Diagnostics II

*Paperwork for the Internship must be completed and placement secured *before* registering for EDUC 5393--Internship.

5 INTERNSHIP COURSE INFORMATION

Students must complete a minimum of 300 hours of supervised placement. It is recommended that a student complete 150 hours in EDUC 5393A, and 150 hours in EDUC 5393B for a total of 300 hours. Students who do not make progress towards their internship hours will be required to repeat EDUC 5393B until all hours have been fulfilled.

5.1 EDUC 5393A INTERNSHIP IN EDUCATIONAL DIAGNOSTICS I

Internship hours of supervised activities under a licensed educational diagnostician or school psychologist in an approved setting. Students are directly supervised by a university supervisor during the internship, following the requirements outlined in the educational diagnostician Internship handbook. Prerequisite: Program Coordinator approval

5.2 EDUC 5393B CONTINUING INTERNSHIP IN EDUCATIONAL DIAGNOSTICS II

Continuation of the internship with supervised activities under a licensed educational diagnostician or school psychologist. The internship is directly supervised by a university supervisor, and students must meet the requirements specified in the educational diagnostician internship handbook. Prerequisite: Program Coordinator approval

6 BEGINNING INTERNSHIP

In order to register and participate in the internship course EDUC 5393 Internship, an educational diagnostician candidate must:

1. Complete all core course requirements,
2. Hold a minimum cumulative GPA of 3.0,
3. Complete all forms within this handbook, and
4. Submit forms to the Director of Graduate Admissions & Student Support.

6.1 INTERNSHIP INFORMATION

The internship consists of three major components: 1) the intern or candidate, 2) the cooperating school system or another educational enterprise, and 3) the University of the Southwest. The internship is an investment in development as an educational diagnostician from which all three participants will derive benefits and in which all three have definite responsibilities. Through this tri-dimensional model, the areas of accountability are identified and assigned.

Intern/Candidate: The Intern is to plan and carry out the leadership activities agreed upon by the intern, the on-site supervisor, and the university supervisor. The intern maintains a daily log of activities in which they are involved. In addition, the intern participates in on-campus meetings, seminars, and on-site conferences.

On-site supervisor/mentor: The on-site supervisor is the practicing administrator. The on-site supervisor works with the candidate to structure internship experiences within the school context to meet the requirements outlined in the syllabus.

University Supervisor: The university supervisor is a university professor who visits the internship site. If the site is not local, meetings will be held virtually. The supervisor reviews logs and ePortfolio artifacts to determine the final grade with input from the site supervisor.

6.1.1 ON-SITE SUPERVISOR'S RESPONSIBILITIES & REQUIREMENTS

1. Site Supervisors will guide the student intern with experiences to enhance their professionalism, responsibility, communication skills, critical judgment, and technical skills throughout this 300-hour internship.
2. Complete and return the Supervision Agreement. The on-site supervisor must be Level 3 certified or licensed as an educational diagnostician, school psychologist, or a licensed psychologist.
3. Provide the student intern with learning experiences based on the New Mexico State Competencies for the educational diagnostician.
4. Discuss and model best practices for the educational diagnostician, and be willing to communicate your expertise with the intern.
5. Provide the intern with various testing, report writing, and IEP experiences and provide feedback on how to improve their skills.
6. Provide consultation and supervision for the educational diagnostician intern, that is, conference once weekly with the intern.

7. Review and sign weekly logged hours, which report experiences are recorded accurately.
8. Assist with the formation of student goals for the internship and co-sign evaluation reports.
9. Advise the program supervisor of any problems that occur concerning the student.
10. Advise the program supervisor of any type of assignment that is not possible on-site so that the appropriate substitution can be provided.
11. Evaluate the educational diagnostics intern using the forms provided and the New Mexico State Competencies completed as a guide.
12. Site Supervisors will not be responsible for the final grade, but if the candidate does not have the skills necessary to recommend them as an educational diagnostician, please let the University Supervisor know why their performance was not adequate in the comments section of the evaluation form.
13. Certify that the educational diagnostician intern has completed the state-required 300 hours in educational diagnostician activities through a review of the exit Portfolio.

Please feel free to contact:

Dr. Molly Tait

Educational Diagnostics, University Supervisor mtait@usw.edu

469-441-8248.

6.1.2 UNIVERSITY SUPERVISOR QUALIFICATIONS & RESPONSIBILITIES

The university supervisor will provide the intern with structured guidance and ongoing support. The university supervisor will (a) be a currently certified Educational Diagnostician, or (b) hold at least a master's degree (relating to Educational Diagnostician or related field) and comply with the same number, content, and type of continuing professional education as those required for educational diagnosticians.

The responsibilities are to:

1. Represent the College of Education, Educational Diagnostician Program, to function as the Instructor of Record and to submit the interns' official grades to the university.
2. Assist prospective interns in locating appropriate internship sites.
3. Provide an orientation for prospective interns regarding internship experiences.
4. Meet with interns and site supervisors virtually during the semester to evaluate the internship experience and to assist with any problems or issues that may arise, as needed.
5. Be available to interns and site supervisors to work through any problems or issues.

6. May hold monthly online discussions with interns for group supervision and discussion of relevant issues and cases.
7. Evaluate the internship experience with interns and on-site supervisors.
8. Collect, review, and evaluate interns' completed course requirements and electronic portfolios.

6.1.3 INTERN RESPONSIBILITIES

The intern assumes a significant share of the responsibility for the success of their field experience. The internship program aims to provide diagnostician candidates with meaningful and relevant experiences. The intern is subject to the sponsoring school district's authority, rules, and regulations. Participants gain valuable work-related experience that will provide a competitive advantage when applying for a position. Specific responsibilities of the intern include:

1. Apply and receive approval for an internship at least eight weeks prior to registering for the course by submitting the Application for Internship form.
2. Complete and submit all internship course requirements (see course checklist).
3. Locate an appropriate internship site and an on-site licensed supervisor with the assistance of a university faculty member.
4. Arrange any requested meetings between involved parties (intern, university supervisor, on-site supervisor).
5. Keep the on-site and university supervisor informed of any problems or concerns that may arise during the internship and discuss these with the appropriate supervisor.
6. Perform all internship duties professionally, legally, and ethically and contact the on-site supervisor and university supervisor when any concerns arise.
7. Notify all persons to be assessed that an intern in training will participate throughout assessments, discuss the case with supervisors, and document notifications.
8. Become knowledgeable of and follow the policies and procedures of the host school or agency.
9. Always secure written informed consent for any testing.
10. Meet the on-site supervisor weekly to discuss cases and review scoring and interpretations.
11. Keep a "Supervision Log" of meetings, including the dates, length of the meeting, and points of discussion. See Internship Checklist.
12. Complete four (4) Full and Individual Evaluation (FIE) reports.
13. Maintain confidentiality of all records and internal matters of the school district at all times.
14. Facilitate at least one (1) Evaluation Team or IEP Committee meeting (submit a copy of the signature page with all other names and signatures redacted)

6.1.4 CODE OF ETHICS

In the Educational Diagnostician program, a crucial component is adherence to a stringent code of ethics outlined in a dedicated link below. The New Mexico code of ethics is a thorough guideline and a reference point, promoting a culture of honesty, integrity, professional competence, and respect throughout the program.

<https://www.srca.nm.gov/parts/title06/06.063.0004.html>

6.1.5 RESPONSIBILITIES OF USERS OF STANDARDIZED TESTS

https://webnew.ped.state.nm.us/wp-content/uploads/2022/09/2022_23_DTC_Manual.pdf

<https://www.srca.nm.gov/wp-content/uploads/attachments/06.010.0007.pdf>

6.2 SITE SELECTION

In preparation for the placement, it is recommended that the intern identify a possible site. Students are encouraged to reach out to the special education leadership in the district where they are employed. Students not currently employed in a school district, charter school, or accredited private school are encouraged to begin securing a site early in the program. **The University of the Southwest will not provide placement, assessment, or scoring services.**

6.3 APPROVAL OF THE SCHOOL DISTRICT

The intern must have written approval from the site supervisor. The intern should contact the director of special education or designee and request information on the steps necessary to get district approval to complete a clinical internship in the district. The appropriate administrator is often a director, coordinator, or supervisor in the central special education department office.

6.4 SUGGESTED INTERNSHIP ACTIVITIES

Ideally, the intern shall spend 25% - 50% of their time in direct (face-to-face) services with students. The following represents a small sample of potential activities:

1. Assess special education initiatives, such as inclusion, and work with interested faculty to develop improvement plans.
2. Review the availability of evaluation instruments and report writers.
3. Assess the school culture by collecting data on the diversity (e.g., population, language, disability, gender, race, socio-economic) of the school and community. Use that data to assist with appropriate formal testing to administer to students.
4. Become familiar with and utilize existing data commonly available to schools.
5. Conduct an audit of the IEP development process.
6. Draft evaluation meeting reports for the review of IEP.
7. Review the CHC cognitive processing areas to assist with determining the best practices for student learning, then lead a faculty discussion of the application of the theory to improve student learning.
8. Communicate with related services personnel (counselor, physical therapist, occupational therapist, special transportation, school nurse).
9. Review technologies, including assistive technologies, available to support the needs of students enrolled in the special education program.
10. Prepare necessary notices for parents, school staff, and related services personnel.

6.5 EVALUATION OF THE INTERN

The internship provides clinical experiences designed to allow for a thorough immersion in educational diagnosticians' operational and academic activities. Throughout the internship experience, the university supervisor is available to both the intern and the site supervisor.

The efficacy of the program is paramount to the continued success of the program. Therefore, the College of Education utilizes a continuous improvement process to evaluate and monitor program results. At the close of the clinical experience, a formal evaluation with input from the intern, the university supervisor, and the site supervisor will be conducted.

7 APPENDIX A: INTERNSHIP DOCUMENTS

7.1 INTERNSHIP APPLICATION

Internship Application

Candidate's name: _____

E-Mail: _____ Phone: _____

Address: _____

Work Address: _____ Work Phone: _____

Cell Phone: _____

Internship I will begin: Fall ____ Spring ____ Summer ____

Internship II will begin: Fall ____ Spring ____ Summer ____

Student teacher requested: Yes ____ No ____

Host Site School District Agency: _____
